

The *A* Game Men's development team was created 3 years ago for two main reasons:

1. To surround elite high school players with pros and teach them the game at the highest level on and off the court
2. To create a playing environment good enough for our elite university graduates to use as exposure in preparation to play in Europe and other Pro leagues.

To date, we have helped 6 players earn professional playing contracts and worked with over 10 of Canada's best high school players. We provide our high school athletes with a playing level significantly greater than high school or much more structured than AAU.

With the growth of our program and the continued success of our athletes we are very proud to announce our **2011 Fall Schedule**. From the inception of our **development model** 3 years ago, we have grown at a rapid pace. We started with two or three games vs elite competition, and now we are playing close to 20 games each fall vs high end C.IS, NCAA and OCAA competition.
